It is a chat app with database that can allow users to communicate with the others privately, face-to-face, or in groups. It can be simultaneously used as a chat app, cellular texting service of SMS, and incoming or outgoing phone and video calling. This so-called all-in-one app is considered threatening to take over the conventional mediated communication methods, such as SMS and phone calls. Facebook Messenger File Information Last updated: August 6, 2022 Developer: Facebook Version: 372.0.0.10.112 (304411000) Requirement: Android 5.0 and up File size: 53.3 MB Uploaded: August 6, 2022 at 1:07PM GMT+07 MD5: bf82c843db67f6b8a3c299943fd1d9dd SHA1: e53fa4a544f02f979a4dc52276fca17af3d8b4c5 Available on Google Play: Install from Google Play Facebook Messenger app review Facebook Messenger for Android offers many alluring features that make the users engrossed in it. Audio clips, images, videos and customized large emojis can be sent through the messenger. There is also a feature that allows the users to send money via the service it offers. This app has enormous stickers that appear in the forms of cute, tiny, and high-quality images. If you download the app only to experience the hyped fun, rather than the messaging core feature, you can make use of the VoIP calls or video chat features. The voice call feature allows us to have the conversation in a group. Furthermore, Facebook has put privacy as the main concerns. That is why the developers created Secret Conversation mode in order to respect the privacy of its users. You can set the mode from the setting and choose one phone to be the default. This feature is called secret conversation as it is encrypted end-to-end. That is to mean, the users can only read on the device they have chosen to send and receive the messages. Either Facebook or legitimate authorities are not able to the messages. Secret modes are activated by being encrypted using the open-source signal protocol. This is what make the messages can only be read by the recipients when using the secret conversation mood. In the normal mode of messaging, it is encrypted to prevent the interception with the encryption keys. This feature is also available on Whatsapp app that is also developed by Facebook. With that said, the messages can still be read by Facebook or legitimate authorities with a court order. Here are the pros and cons of this app. Pros: It is a free app. Your privacy is safe. Fun app. Cons: There are too many trivial additional built-in apps. How to Use It does not require much procedures and explanations to get started. You do not need to make and have a Facebook account to use this messenger. Basically, it only takes your mobile phone numbers. When it comes to the setup, you will be asked to enter your mobile phone numbers and give permission to access your contacts. The setup does not consume so much time. If you already have a Facebook account, simply start the setup by logging in to your existing account. When the required process is done, you are already logged in to the app and ready to use it. All the messages and the contacts will automatically be transferred after confirmation. Facebook Messenger for Windows is a free application available for download on any personal computer. It had been integrated within the Facebook platform itself and developed in 2012 as a separate app. After years of adding features and whittling them back down, Messenger has achieved a happy medium. The application runs great on a laptop because it requires a lot of data which might burden a mobile device. A great way to make yourself available to your community Features FB communication can be done in a variety of ways. The app offers audio clips, images, video, emojis, and stickers to send to your pals. Amazingly, users may transfer money through the chat app if he or she chooses to register their bank account information on the app. The developers have not stopped there. The app allows for VoIP and live video chat one-on-one and in groups as well. Group chat is also on offer for persistent chats among up to 10 users. Messenger's chatbots provide information or receive action commands when you type with them. You find them through the search bar. Rather disappointingly, the utility of these chatbots is diminished by the fact, each one is designed for a specific function. I believe this makes it needlessly difficult to discern what powers they hold. Messages on the app are transmitted through encryption keys that are managed by Facebook. Ostensibly Facebook or government officials can obtain those messages if garnered through the proper legal channels. Facebook offers an extra layer of privacy protection through the Secret Conversations mode. Secret Conversations use the Signal system to transfer end-to-end fully encrypted messages and enable the timer to set an expiration date on the message. The message will then be deleted forever. The black bar across the top of the screen imbues on the user the secrecy of this texting mode. Otherwise, the experience feels like a simpler version of the normal chat mode. Secret Conversation mode still allows the user to send text, stickers, videos, photos, and location. Facebook's brand made it the most popular social media platform in the world. This leads to FB messenger's best feature; everyone is already on it! There is no need to goad your friends and family into downloading a new app. If by chance they are not on Facebook, the app can send SMS messages to anyone's phone number easily. Third-party apps don't always take to FB Messenger very well. But, sometimes these apps offer a feature that completes the already impressive catalog of emoji, stickers, GIFS, and other media products. Messenger is ahead of the curve in another domain. The chat app is prioritizing interoperability between other famous chat products. This means users can send messages directly to WhatsApp and Instagram users. This feature will keep Messenger abreast of the latest developments in the chat app space which should boost your confidence in its use. The app has a great look to it as well. The icons are appealing and conversations are neatly stacked to the side, ready to be drawn up at any time. The application is stable, fun and has a large audience. These are great features in a chat application. Where can you run this program? This software is available for download on any PC that operates using Windows operating system. Facebook.com has a link that will download the messenger app to your desktop. Is there a better alternative? Messenger even still after 2018 is a large app which uses a lot of data and RAM and battery life. FB Developers have recognized this issue and provided a more nimble and less intrusive application. Messenger has the same interface and support. WhatsApp is there to put a smile to a friend's face. This app is home to customizable fonts, gifs, emojis, and stickers. Its interface is tooled to keep pace in the flow of an enjoyable conversation. Google Hangouts product has been a venerable bulwark in the communication apps space. Google Hangouts remains a popular and suitable chat application for millions. Built on a concise and powerful software, Hangouts became Google's most utilized chat application. This will all be changing in the near future, however. Hangouts is experiencing a transition period that will culminate in its eventual abandonment. For the time being, Hangouts will remain a stable and efficient chat application through October 2019. On a desktop, however, all the media products available for sharing on Facebook Messenger run more smoothly. Facebook Messenger is an excellent messenger app for the simple reason that everyone is on it! Should you download it? Yes. Messenger for Windows should be welcomed by anyone using a PC that runs Windows software. Grandparents immediately spring to mind. Older generations often use PC desktops. If not for Messenger on Windows, this population would likely not be able to use the product at all, because they may not have a mobile device to download the app. The product is ideal for anyone who uses their PC throughout the day and finds themselves constantly picking up their phone to communicate. Many might fit that description but work in an office where downloading a messenger app would not be tolerated. These people will have to keep Messenger on their mobile device or their home computer. 372.0.0.10.112 Aug 5th, 2022 371.1.0.12.107 Jul 29th, 2022 371.0.0.11.107 Jul 27th, 2022 371.0.0.10.10 Jul 15th, 2022 368.0.0.12.109 Jul 8th, 2022 367.0.0.9.112 Jun 29th, 2022 366.0.0.10.107 Jun 23th, 2022 365.0.0.10.110 Jun 17th, 2022 364.0.0.10.112 Jun 15th, 2022 363.0.0.4.102 May 31st, 2022 362.0.0.8.108 May 29th, 2022 362.0.0.4.108 May 21st, 2022 361.0.0.7.107 May 18th, 2022 360.0.0.10.113 May 16th, 2022 359.0.0.6.112 May 4th, 2022 358.0.0.13.131 Apr 28th, 2022 357.0.0.13.112 Apr 20th, 2022 356.0.0.13.105 Apr 13th, 2022 355.0.0.17.114 Apr 9th, 2022 354.0.0.10.113 Apr 8th, 2022 Instantly connect with the people in your life.
